## About this Guide

This document explains how to create the Business Object Documents (bo) package and make it available in existing package combinations in Baan ERP 5.0c.

This document contains the following chapters:

Chapter 1, "Introduction," introduces the document and provides a list of definitions.

Chapter 2, "Adding bo Package to Package Combinations," explains how to create a new Package VRC and include it in the package combinations.

### **Send us your comments**

We continually review and improve our documentation. Any remarks/requests for information concerning this document or topic are appreciated. Please e-mail your comments to [documentation@infor.com](mailto:documentation@infor.com).

In your e-mail, refer to the document code and title. More specific information will enable us to process feedback efficiently.

# Chapter 1

## Introduction

# 1

The bo package is released for Baan ERP 5.0c. This document provides the steps you must complete to create the package and make it available in existing package combinations; before you install the PMC solution, these steps must be completed.

## Abbreviations

Abbreviations that are used in this document are listed below.

| Abbreviation | Term                              |
|--------------|-----------------------------------|
| bo           | Business Object Documents Package |
| VRC          | Version Release Customer          |
| PMC          | Product Maintenance and Control   |
| SOA          | Service Oriented Architecture     |

---

## Chapter 2

# Adding bo Package to Package Combinations

# 2

To create a new Package VRC and add it to package combinations, complete the following steps.

**IMPORTANT:** Before you install the PMC solution, complete the following steps.

- 1 Start the Packages (ttadv1100m000) session and add the new bo package, as shown here:

- 2 Start the Package VRCs (ttadv1511m000) session. Create a new VRC 2.1U b5 bo for the bo package. Set the status of the VRC to Released. An example of the new Package VRC is as follows:

ttadv111s000 : Package VRCs [User: baan] [000]

Package: bo Business Object Documents

Version: 2.1U

Release: b5

Customer: bo

Description: Business Objects 2.1

Status: Released

Derived from:

Version:

Release:

Customer:

Integration with:

Package VRCs in:

Pack. Combination:

Buttons: Save, Close, Revert, Help

- 3 Start the Directories of Software Components (ttadv1115m000) session and enter the directories for the VRC:

ttadv1115m000 : Directories of Software Components [User: baan] [000]

Package: bo Business Object Documents

VRC: 2.1U b5 bo Business Objects 2.1

| Software comp.  | Path on System      |
|-----------------|---------------------|
| Forms           | \${BSE}/application |
| Menus           | \${BSE}/application |
| Objects         | \${BSE}/application |
| Program Scripts | \${BSE}/application |
| Functions       | \${BSE}/application |
| Report Scripts  | \${BSE}/application |

NUM

- 4 In the Packages by Package Combination (ttaad1121m000) session, include the new Package VRC in all the package combinations that will use the functionality from the Business Object Documents:

NUM

**Note:** If you do not require SOA functionality, do not include the bo package in package combinations.

- 5 Save the modification. To rebuild the data dictionary, start the Rebuild DD option from the Specific menu.
- 6 Start the Update VRC's (tptmc2140m000) session. Create a new Update VRC 2.1U b5 bo. Set the Base VRC to 2.1 b5 bo. Set the VRC Combination to the same value as the VRC Combination for your production environment, or leave the VRC Combination empty. An example of the new Update VRC is as follows:

ttpmc2140m000 : Update VRC's [User: baan] [000]

| Package For Determining | Update VRC  | Base VRC    | VRC Combination |
