Chapter 1

Introduction

1

The bo package is released for Baan IVc4. This document provides the steps you must complete to create the package and make it available in existing package combinations; before you install the PMC solution, these steps must be completed.

Abbreviations

Abbreviations that are used in this document are listed below.

Abbreviation	Term
bo	Business Object Documents Package
VRC	Version Release Customer
PMC	Product Maintenance and Control
SOA	Service Oriented Architecture

Chapter 2

Adding bo Package to Package Combinations

2

To create a new Package VRC and add it to package combinations, complete the following steps.

IMPORTANT: Before you install the PMC solution, complete the following steps.

- 1 Start the Maintain Packages (ttadv1100m000) session and add the new bo package, as shown here:

- 2 Start the Maintain Package VRC's (ttadv1111m000) session. Create a new VRC 2.1U b4 bo for the bo package. Set the status of the VRC to Released. An example of the new Package VRC is as follows:

ttadv1111m000 : Maintain Package VRC's [000]

Package VRCs in

Pack.Combination

- 3 Start the Maintain Directories of Software Components (ttadv1115m000) session and enter the directories for the VRC:

- 4 In the Maintain Packages by Package Combination (ttaad1121m000) session, include the new Package VRC in all the package combinations that will use the functionality from the Business Object Documents:

Note: If you do not require SOA functionality, do not include the bo package in package combinations.

- 5 Save the modification. To rebuild the data dictionary, start the Rebuild DD option from the Specific menu or click the Rebuild DD button.

- 6 Start the Maintain Update VRC's (ttpmc2140m000) session. Create a new Update VRC 2.1U b4 bo. Set the Base VRC to 2.1 b4 bo. An example of the new Update VRC is as follows:

After you have completed the process, you must log on again.
