About this guide

This installation guide describes the PMC setup procedure for the Infor LN 10.7 Andersen customization.

This document contains the following chapters:

Chapter 1, “Introduction”, provides a short introduction on the setup of PMC.

Chapter 2, “Prerequisites”, describes the prerequisites to install the Andersen customization.

Chapter 3, “Setup Procedure”, describes the procedure to setup PMC for the Andersen customization.

Contacting Infor

If you have questions about Infor products, go to Infor365 Online Support at <http://www.infor365.com>.

If we update this document after the product release, we will post the new version on Infor365. We recommend that you check this Web site periodically for updated documentation.

If you have comments about Infor documentation, contact documentation@infor.com.

Chapter 1 Introduction

1

The Andersen customization was initially developed and deployed without making usage of PMC. This made it cumbersome to keep the Andersen customization properly synchronized with the standard Infor LN 10.7 product. Therefore, Infor made the Andersen customization subject to PMC control. This guide describes how to setup PMC for the Andersen customization at the PMC recipient side.

Chapter 2 Prerequisites

2

This chapter describes the prerequisites to setup PMC for the Infor LN 10.7 Andersen customization. Following are the prerequisites:

- **Application Solutions Infor LN 10.7**

Prior to setting up PMC for the Infor LN 10.7 Andersen Customization, you must have installed the Monthly collections up to and including November 2021 for ERP LN 10.7. Refer to KB **2042696** for Infor LN 10.7 to get the links of all the monthly collections.

This chapter describes the procedure to setup PMC for the Infor LN 10.7 Andersen Customization.

PMC setup for the Andersen Customization

If you already have installed the Andersen Customization, you can skip steps 1, 2, 3 and 4 of the below instructions and continue with step 5.

- 1 Create package VRC's in which the Andersen customization is to be installed for the packages tc, td, ti, and wh. The package VRC's could e.g. be coded like B61U_25_andc. Package VRC's can be created using the 'Package VRCs' (ttadv1511m000) session.
- 2 Create a package combination for the Andersen customization. The package combination could e.g. be coded like b61u25ac. Package combinations can be created using the 'Package Combinations' (ttaad1520m000) session.
- 3 Link package VRC's to the package combination which you created instep 2. This can be done using the 'Packages by Package Combination' (ttaad1121m000) session. Link the package VRC's which you created in step 1 to this package combination. In addition to this, link the standard package VRC for all remaining packages to this package combination.
- 4 Create the runtime data dictionary by clicking the "Create Runtime Data Dictionary..."option in the 'Package Combinations' (ttaad1520m000) session for the package combination created in step 2.
- 5 Create a VRC combination using the 'VRC Combinations' (ttpmc2150m000) session. You could code the VRC combination for example like b61u25
- 6 Define a PMC update VRC using the 'Update VRCs' (ttpmc2140m000) session. Populate the various fields as follows:
 - Package to Determine VRC Structure: ti

- Update VRC: for example B61U_25_andc. This should be the package VRC created in step 1.
 - Base VRC: B61C_25_andc
 - VRC Combination: for example b61u25. This should be the VRC combination created in step 5.
- 7 In the 'Update VRCs' (ttpmc2140m000) session, search the update VRC in which standard LN 10.7 solutions are installed. Fill the 'VRC Combination' field of this update VRC with the VRC combination which you created in step 5.

After having completed the above steps, your environment is prepared for installing PMC solutions for the Andersen customization. In addition to this the system will take care that the Andersen customization remains synchronized with standard Infor LN 10.7.

Post-installation tasks

As your environment is now prepared to install PMC solutions for the Andersen customization, you can install the initial PMC solution for the Andersen customization. The initial solution can be downloaded from KB **2226578**. This solution must be scanned and installed applying the regular PMC installation procedures in the PMC update VRC which was created in step 6.
