About this document

This Language Pack for iBaan E-Enterprise Server 2.5 SP1, iBaan E-Sales 2.3, and iBaan E-Service 2.1 deviates from the English version in the installation, system administration, and customer use. This document briefly explains how to download the Language Pack and how to install it.

1 Introduction

Prerequisites

- iBaan E-Enterprise Server 2.5 SP1 running on top of iBaan E-Enterprise Server 2.5
- iBaan E-Sales 2.3 running on top of iBaan E-Enterprise Server 2.5 SP1
- iBaan E-Service 2.1 running on top of E-Enterprise Server 2.5 SP1.

Installation

- 1 On the Web server, create an empty folder.
- 2 Copy the LP file from www.support.baan.com into the newly created folder.
- 3 Start setup.exe from the new folder

NOTE 1 Important: You must install the following solutions from www.support.baan.com

- 133785 for iBaan E-Service 2.1
- 129917 for iBaan E-Enterprise Server 2.5 SP1
- 129916 for iBaan E-Sales 2.3

NOTE 2

- Only upgrade to a newer release of iBaan E-Service 2.1 if a Language Pack is available for all your installed applications.
- Before installing the Simplified Chinese environment, please read the Technical Notes pertaining to E-Enterprise Server 2.5, E-Sales 2.3 and (or) E-Service 2.1 that came with the application bundle for the Language Pack for which you are looking.

Character display simplified Chinese

- Addendum to the Installation Guide of simplified Chinese EES 2.5 Language Pack (EET001IG US) :
 - During the installation of SQL server, collation should be Chinese(PRC).
 - Change in regional settings. Set the default language as Chinese so that all labels, menus , and so on, are displayed in Chinese.
- After installation of iBaan E-Enterprise Server 2.5 SP1, US English solution 135406 for EES must be installed. This solution will display the Chinese labels properly.
- If you are on iBaan E-Enterprise Server 2.5 SP2, US English Solution 135406 is not required. However, because the Language Pack was developed on iBaan E-Enterprise Service 2.5 SP1, still a few labels, Help text and image files will not have been translated and will be displayed as blank entries. This will be solved in the Language Pack for SP2.
